

## **Inteck, Inc. Develops Process for Historical Database Conversion: A Case Study**

**DENVER, COLORADO, March 19, 2009.** Inteck, Inc., an information technology (IT) consulting firm for the healthcare industry, produces a new case study on a process for Historical Database Conversion. This is the result of a recent project completed where Inteck consultants designed and implemented a stand-alone database healthcare professionals could access with ease.

Inteck has assisted facilities in saving or “converting” historical patient medical and financial information in the past. In a database conversion, patient medical and financial information is extracted from the legacy health information system (HIS) and housed in a user-friendly environment/database. This allows hospital personnel and physicians easy access to patient critical data. This service is offered when the legacy HIS is replaced by another dissimilar health information system. The challenge is to eliminate this unnecessary expense of maintaining an old HIS while continuing to access the historical information.

Inteck’s knowledgeable and experienced consultants have written a case study that looks into the challenges a healthcare facility will face to preserve this historical database information when transitioning from a legacy health information system to a new system. This case study explores how Inteck can design a stand-alone database to house the historical data, eliminating added monthly expenses to maintain the old system.

“Inteck is dedicated to serving our clients with expertise and providing solutions to match their needs, so objectives can be met. Inteck’s commitment to the healthcare industry remains to provide sound solutions to increase patient safety and the efficiency within a healthcare facility,” stated Donald Jacobs, President, Inteck, Inc.

A copy of this case study can be downloaded by visiting the Inteck website at [www.Inteck-Inc.com/news\\_casestudies.htm](http://www.Inteck-Inc.com/news_casestudies.htm)

### **About Inteck, Inc.**

Since 1982, Inteck has provided IT consulting services to the healthcare industry. Inteck specializes in aligning an organization’s IT plan with its vision and business plan. Inteck provides services in the area of optimization and enhancement of existing systems; strategic and tactical IT planning; system implementation; assessment and evaluation; and facility management and outsourcing. Inteck also provides a complete set of services that support most hospital information system vendors. With staff located nationwide, Inteck employs healthcare information specialists, clinicians, chief information officers and healthcare professionals. For more information on Inteck, please visit [www.Inteck-Inc.com](http://www.Inteck-Inc.com).
