### ***Inteck Enhances Services With Three New Leaders***

**DENVER, COLO., June 16, 2005** — Inteck, an information technology (IT) consulting firm for the healthcare industry, has added three new faces to the company: Roy Crookshanks as Director of Technology, Jeff Kerber Manager of General Consulting and Jason Polli Director of MEDITECH Practice.

Mr. Crookshanks will be responsible for ensuring that hospitals have the appropriate technology to enable clinicians to access patient information from wherever they are. Satisfying these goals requires high-speed, easy-to-use; yet secure connectivity with all of the different databases of the organization. Crookshanks has over 20 years of experience in analyzing, designing and implementing technology in healthcare and providing technology consulting services. He served as the CIO for many different hospitals and has developed strong relationships with the HIS and hardware vendors.

Mr. Kerber will be responsible for General Consulting activities, which includes working with clients to identify their needs, objectives and expectations and helping them select and install HIS in their organizations. Kerber has approximately 15 years of healthcare IT experience. He has a solid understanding of the industry's unique needs. He has experience in IT planning, system selections and system implementations, including process improvements that maximize IT usage.

Mr. Polli will be responsible for MEDITECH consulting engagements. He will ensure that Inteck's services help its clients use the MEDITECH system effectively and that the clients' needs are satisfied. Polli has more than 10 years experience in the healthcare industry. He is an expert in the MEDITECH system. He is experienced in system implementations, system consulting, IS senior leadership, and quality assurance. He has managed multiple MEDITECH hospital IS implementations, including both the financial and clinical modules. He has leadership experience within numerous MEDITECH Healthcare Systems, most recently as an Executive IT Director for an 11-hospital health system. He has also provided executive IT oversight for more than 8 MEDITECH system implementations.

Since 1982, Inteck has provided IT consulting services to the healthcare industry. Inteck specializes in aligning an organization's IT plan with its vision and business plan. Inteck provides services in the area of optimization and enhancement of existing systems; strategic and tactical IT planning; system implementation; assessment and evaluation; and facility management and outsourcing. Inteck also provides a complete set of services that support most hospital information system vendors. With staff located nationwide, Inteck employs healthcare information specialists, clinicians, chief information officers and healthcare professionals.
