Electronic Medical Record services offered by Inteck, Inc.

DENVER, COLORADO, February 7, 2006. Inteck, an information technology (IT) consulting firm for the healthcare industry, offers an Electronic Medical Record (EMR) support program with the appointment of Peter Caplan as Director of EMR Program.

With the increasing emphasis on hospitals developing an EMR, Inteck has developed a program to provide the education and technical expertise, which will result in a successful implementation. Unlike other computerization projects, implementation of an EMR is more complicated because it requires the involvement of everyone associated with the hospital (including board members) and affects the workflow processes of all caregivers. Also, since most hospitals have software applications from multiple vendors, it requires interoperability between these systems to provide caregivers with all of the patient information required to administer care.

Inteck's program consists of four phases:

1. Education/awareness-building
2. Developing a Strategic EMR Plan
3. Implementation of the Plan including integration (interoperability of existing systems) & technical testing
4. Operational Readiness Testing (ORT) & Implementation of the EMR

The first phase is a series of four onsite education program's customized for the Board of Directors, Senior Management, Department Managers and all hospital staff which will define what an EMR is, the role of each person and they will be affected. It includes:

- What are the major issues/goals related to systems integration
- How to involve your Board of Directors, physicians, and staff throughout the education, planning, and implementation process.
- Measures/benchmarks for system performance

Mr. Caplan is a strategic planner and healthcare economist. He has been a featured speaker at several regional and national conferences on telemedicine, HIPAA, and information technology applications in healthcare education. Mr. Caplan holds graduate degrees in Urban Planning and Economics and has completed postgraduate research in public administration.

To learn more about EMR and to schedule your presentation, please contact Info@Inteck-Inc.com or complete the form at www.Inteck-Inc.com/EMRpresentation.htm

About Inteck, Inc.

Since 1982, Inteck has provided IT consulting services to the healthcare industry. Inteck specializes in aligning an organization's IT plan with its vision and business plan. Inteck provides services in the area of optimization and enhancement of existing systems; strategic and tactical IT planning; system implementation; assessment and evaluation; and facility management and outsourcing.
