## ***Inteck to Present on 'Pitfalls of eMAR Implementation' and 'Medical Equipment Integration' at MUSE Western US 2005***

**DENVER, COLORADO, August 15, 2005** — Inteck, an information technology (IT) consulting firm for the healthcare industry, is scheduled to present at the MUSE Western US Conference. The Medical Users Software Exchange (MUSE) conference, being held at the end of August in New Orleans, LA, is designed as a communication and support network for facilities and vendors working within the MEDITECH healthcare information software system.

The first topic "Pitfalls To Watch out for when Implementing Electronic Medication Administration Records" addresses the hot topic among hospitals today due to the tremendous potential for medication administration error reductions; however, implementing this type of system can be quite difficult. "We are very excited to be able to share our knowledge of such an important topic to those who need it," states Jason Polli, Director, MEDITECH Practice.

The second topic will be presented in partnership with Capsule Technologie. "Seamless Medical Instrument Integration with MEDITECH," is an important issue for hospitals today. For a hospital to have a complete electronic medical record, it needs access to the data from the medical equipment used to treat and monitor its patients. There are many issues involved in being able to integrate this data into a hospital information system.

#### About Inteck:

Since 1982, Inteck has provided IT consulting services to the healthcare industry. Inteck specializes in aligning an organization's IT plan with its vision and business plan. Inteck provides services in the area of optimization and enhancement of existing systems; strategic and tactical IT planning; system implementation; assessment and evaluation; and facility management and outsourcing. Inteck also provides a complete set of services that support most hospital information system vendors. With staff located nationwide, Inteck employs healthcare information specialists, clinicians, chief information officers and healthcare professionals. For more information on Inteck, please visit [www.inteck-inc.com](http://www.inteck-inc.com).

#### About Capsule Technologie:

Capsule Technologie is the world's leader in Medical Device Connectivity software and solutions. The Company's flagship product DataCaptor™ is a product that allows an organization to collect data from an extensive library of bedside medical devices in a real time and access the data from the hospital's clinical application (e.g., MEDITECH Nursing System).
